SUMMARY

Computer Science undergraduate (**CGPA: 9.15/10.0**) targeting **Software Development Engineer (SDE)** roles. Experienced in architecting production REST APIs, real-time messaging systems, and automated data pipelines for **1,000+ active users**. Combines hands-on full-stack development using **JavaScript, React.js, and Node.js** with strong Data Structures & Algorithms fundamentals.

EDUCATION

Vellore Institute Of Technology, Bhopal, Madhya Pradesh *Expected May 2027*
B.Tech. in Computer Science and Engineering; CGPA: 9.15/10.0

R.P.M. Academy, Gorakhpur, Uttar Pradesh
Class XII (CBSE) — 90.6% *May 2022*
Class X (CBSE) — 96.6% *May 2020*

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, SQL
Web Engineering: Node.js, Express.js, RESTful APIs, HTML, CSS, Bootstrap, React.js
Databases: MongoDB, MySQL
Developer Tools: Git, GitHub, Postman, Hoppscotch

EXPERIENCE

Full Stack Development Intern – *Certificate* *May 2025 – October 2025*
amasQIS.ai | [GitHub](#) *Muscat, Oman (Remote)*

- Engineered RESTful APIs for Employee Profile, Recruitment, and CRM modules using Node.js, Express.js, and MongoDB, supporting interactive React.js interfaces for **1,000+ active users**.
- Optimized Mongoose aggregation pipelines in the Subscription module, eliminating hardcoded fallbacks to synchronize backend state in real time with low-latency dynamic queries.
- Implemented automated document generation workers using **ExcelJS** and **PDFKit**, streaming structured HR data exports and cutting administrative report processing time.
- Conducted API integration testing and schema verification using Postman and Hoppscotch, ensuring edge-case error handling and seamless backend-to-frontend payload delivery.

PROJECTS

Divyam — API Inspector & Bug Reproduction Assistant *July 2026*
React, TypeScript, Manifest V3, IndexedDB, Zod, Vitest | [GitHub](#)

- Architected a local-first Chrome DevTools extension using **Manifest V3** and **React** to capture, filter, and inspect live REST/GraphQL network traffic directly within browser debugging workflows.
- Engineered offline session persistence and request delta comparison using **IndexedDB**, enabling developers to save, replay, and contrast failing vs. successful API payloads across runs.
- Integrated dynamic credential redaction using **Zod** schemas for secure cURL/Markdown report exports, establishing a modular Repository architecture backed by automated **Vitest** suites.

HangOut — Full-Stack Social Media Platform *Dec 2025*
React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Clerk, Inngest | [GitHub](#)

- Architected a MERN-stack social platform featuring chronological activity feeds, real-time connection management, and ephemeral 24-hour stories with custom privacy permissions.
- Implemented low-overhead real-time messaging using **Server-Sent Events (SSE)** and an in-memory connection registry, eliminating unnecessary WebSocket connection handshake overhead.
- Configured asynchronous background tasks via **Inngest** for automated story expiration and scheduled email retries; managed media assets using Multer and ImageKit CDN.

ConfirmStay — Accommodation Listing & Review Platform *Jul 2025*
Node.js, Express.js, MongoDB, Mongoose, Passport.js, Cloudinary | [GitHub](#)

- Developed a full-stack accommodation marketplace following the MVC architecture, utilizing Express.js, EJS, and MongoDB for dynamic listing management and user reviews.
- Enforced session-based authentication using **Passport.js** alongside resource-level authorization checks to restrict property mutations strictly to verified listing owners.
- Built server-side input validation schemas using **Joi** and integrated dynamic Mongoose middleware hooks for automatic cascading cleanups of orphaned reviews upon listing deletion.

ACHIEVEMENTS

- Data Structures & Algorithms:** Solved **300+** algorithmic challenges on [LeetCode](#) and [GeeksforGeeks](#), demonstrating strong problem-solving proficiency.
- Open Source Contribution:** Successfully completed **Hacktoberfest** by submitting and merging **4+ pull requests** across public GitHub repositories, resolving bugs and implementing frontend/backend enhancements.
- Academic Merit Scholarship:** Awarded an **INR 42,000 Academic Scholarship** by school management for top academic performance (96.6% in Class X Board Examinations).
