EXPERIENCE

Full Stack Development Intern – *Certificate* *May 2025 – Oct 2025*
amasQIS.ai | [GitHub](#) *Muscat, Oman (Remote)*

- Developed and maintained backend **REST APIs** for an enterprise HRMS and Project Management platform using Node.js, Express.js, and MongoDB, supporting 50+ internal users within an Agile/Scrum environment.
- Optimized MongoDB queries** and implemented strategic indexing, reducing average API response times by approximately 25% under concurrent simulation loads.
- Executed API testing and validation** using Hoppscotch, writing systematic test cases to isolate regressions, eliminate backend defects, and ensure stable feature deployment.
- Implemented secure authentication structures utilizing Clerk and bcrypt password hashing, and integrated Socket.IO to enable real-time dashboard updates.

PROJECTS

HangOut — Full-Stack Social Media Platform *Dec 2025*
React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Clerk, Inngest | [GitHub](#)

- Engineered a responsive user interface using React.js and Tailwind CSS, managing complex application state cleanly through **Redux Toolkit**.
- Configured an event-driven architectural layer using **Inngest** for asynchronous background workflows alongside ImageKit/Multer for multi-format media uploads.
- Structured reliable backend authentication mechanisms via Clerk and deployed the decoupled application ecosystem on Vercel.

ConfirmStay — Full-Stack Accommodation Booking Platform *Jul 2025*
Node.js, Express.js, MongoDB, Mongoose, Passport.js, Clouinary | [GitHub](#)

- Designed a modular server-rendered booking platform using Express.js and EJS templates, implementing security policies through Passport.js strategies and server-side **Joi schema validation**.
- Integrated Mapbox API for location-based spatial queries and Clouinary for dynamic cloud asset management.
- Handled stateful server operations and user tracking securely using persistent MongoDB-backed session stores.
