EDUCATION

Vellore Institute Of Technology, Bhopal, Madhya Pradesh
B.Tech. in Computer Science and Engineering; CGPA: 9.15/10.0

Expected May 2027

R.P.M. Academy, Gorakhpur, Uttar Pradesh

Class XII (CBSE) — 90.6%

May 2022

Class X (CBSE) — 96.6%

May 2020

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, SQL

Frontend: React.js, Tailwind CSS, Bootstrap, HTML5, CSS3

Backend: Node.js, Express.js, RESTful API

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Hoppscotch

EXPERIENCE

Full Stack Development Intern – *Certificate*

May 2025 – October 2025

amasQIS.ai | [GitHub](#)

Muscat, Oman (Remote)

- Engineered RESTful APIs for Employee Lifecycle, Recruitment, and CRM modules in **ManageRTC** (a unified HR & project-management platform) using Node.js, Express.js, and MongoDB, supporting React.js interfaces for **1,000+ active users** as part of an Agile development team.
- Optimized Mongoose aggregation pipelines for subscription management and workforce metrics, replacing fallback queries with real-time backend state synchronization to reduce query latency.
- Built automated background worker services using **ExcelJS** and **PDFKit** to auto-generate structured HR, payroll, and attendance reports, cutting manual administrative processing effort.
- Implemented granular Role-Based Access Control (RBAC) and conducted systematic API schema verification using Hoppscotch, ensuring edge-case-tested and secure payload delivery.

PROJECTS

Evidence — Document-Grounded Knowledge Layer

Sept 2026

Node.js, Express.js, MongoDB, OpenAI API, Jest, pdf-parse | [GitHub](#)

- Built a knowledge-extraction pipeline that parses PDFs with **pdf-parse** and extracts facts using deterministic regex heuristics, with optional **OpenAI API** integration for semantic extraction.
- Designed a **MongoDB**-backed normalization layer to standardize units, dates, and financial metrics across documents, classifying cross-document claims as corroborated, contradicted, or contextually reconciled.
- Grounded every extracted fact in verbatim source quotes and page numbers for traceability, and validated core normalization and matching logic with automated **Jest** test suites.

Divyam — API Inspector & Bug Reproduction Assistant

July 2026

Manifest V3, React, TypeScript, IndexedDB, Zod, Vitest | [GitHub](#)

- Built a local-first Chrome DevTools extension using **Manifest V3**, **React**, and **TypeScript** to capture, classify, and inspect live REST/GraphQL network traffic within browser debugging workflows.
- Implemented an **IndexedDB**-backed repository layer for session persistence and a pure diff engine to compare failing vs. successful API requests across saved sessions.
- Added **Zod**-validated credential redaction for sanitized cURL/fetch exports and rule-based failure diagnosis, backed by an automated **Vitest** test suite.

HangOut — Full-Stack Social Media Platform – [Live Demo](#)

Dec 2025

React, Node.js, Express.js, MongoDB, Redux Toolkit, Clerk, Inngest | [GitHub](#)

- Built a MERN-stack social platform with chronological activity feeds, mutual connection requests, and ephemeral 24-hour stories with custom privacy permissions.
- Implemented real-time private messaging using **Server-Sent Events (SSE)** and an in-memory connection registry, avoiding WebSocket handshake overhead for lower server resource use.
- Used **Inngest** for durable background workflows (automated story expiration, scheduled email reminders) and **ImageKit**/Multer for compressed media uploads.

ACHIEVEMENTS

- Open Source Contribution:** Completed **Hacktoberfest** by submitting and merging **4+ pull requests** across public GitHub repositories, resolving bugs and implementing frontend/backend enhancements.
- Academic Merit Scholarship:** Awarded an **INR 42,000 Academic Scholarship** by school management for top academic performance (96.6% in Class X Board Examinations).
